

## REST, JSON, and APIs

тот	AL POINTS 10	
1.	Who is credited with the REST approach to web services?	1 point
	Roy Fielding	
	○ Vint Cerf	
	○ Bjarne Stroustrup	
	O Daphne Koller	
	C Leonard Klienrock	
2.	Which of the following is true about an API?	1 point
	An API defines the header bits in the first 8 bits of all IP packets	
	An API defines the pin-outs for the USB connectors	
	An API is a contract that defines how to use a software library	
	An API keeps servers running even when the power is off	
3.	Which of the following is a web services approach used by the Twitter API?	1 point
٥.	CORBA	Tpoint
	○ XML-RPC	
	REST	
	SOAP	
	O SOAF	
4.	What kind of variable will you get in Python when the following JSON is parsed:	1 point
	1 + { "id" : "eel", 2	
	4 1	
	A tuple with three items	
	A list with six items	
	A dictionary with three key / value pairs	
	A list with three items	
	○ A list of tuples	
5.	Which of the following is <i>not</i> true about the service-oriented approach?	1 point
	An application runs together all in one place	.,,,,,,,,
	Web services and APIs are used to transfer data between applications	
	Standards are developed where many pairs of applications must work together	
	An application makes use of the services provided by other applications	
	An application makes use of the services provided by other applications	
6.	If the following JSON were parsed and put into the variable x,	1 point
	1	
	4 * "status": { 5     "text": "@jazzychad I just bought one",	
	6 } 1ocation": "San Francisco, California", 8 "screen_name": "leahculver", name": "Leah Culver", 0	
	18 },	
	what Python code would extract "Leah Culver" from the JSON?	
	(a) x["users"][0]["name"]	
	\(\sigma\text{x[0]["name"]}\)	
	x->name	
	\(\times x["users"]["name"]	
	x["name"]	
7.	What library call do you make to append properly encoded parameters to the end of a URL like the following:	1 point
	1 http://maps.googleapis.com/maps/api/geocode/json?sensor=false&address=Ann+Arbor%	

	re.encode()  re.match()  urllib.urlcat()  that happens when you exceed the Google geocoding API rate limit?  The API starts to perform very slowly  You canot use the API until you respond to an email that contains a survey question  Your application starts to perform very slowly  You cannot use the API for 24 hours  that protocol does Twitter use to protect its API?  SHA1-MD5  Java Web Tokens  SOAP	1 point
99. W	re.match()  urllib.urlcat()  that happens when you exceed the Google geocoding API rate limit?  The API starts to perform very slowly  You canot use the API until you respond to an email that contains a survey question  Your application starts to perform very slowly  You cannot use the API for 24 hours  that protocol does Twitter use to protect its API?  SHA1-MD5  Java Web Tokens  SOAP	
99. W	that happens when you exceed the Google geocoding API rate limit?  The API starts to perform very slowly  You canot use the API until you respond to an email that contains a survey question  Your application starts to perform very slowly  You cannot use the API for 24 hours  that protocol does Twitter use to protect its API?  SHA1-MD5  Java Web Tokens  SOAP

SHA1-MD5  Java Web Tokens  SOAP	
99. W	The API starts to perform very slowly  You canot use the API until you respond to an email that contains a survey question  Your application starts to perform very slowly  You cannot use the API for 24 hours  that protocol does Twitter use to protect its API?  SHA1-MD5  Java Web Tokens  SOAP	
99. W	The API starts to perform very slowly  You canot use the API until you respond to an email that contains a survey question  Your application starts to perform very slowly  You cannot use the API for 24 hours  that protocol does Twitter use to protect its API?  SHA1-MD5  Java Web Tokens  SOAP	
9. W	You canot use the API until you respond to an email that contains a survey question  Your application starts to perform very slowly  You cannot use the API for 24 hours  That protocol does Twitter use to protect its API?  SHA1-MD5  Java Web Tokens  SOAP	1 point
9. W	Your application starts to perform very slowly You cannot use the API for 24 hours  that protocol does Twitter use to protect its API?  SHA1-MD5  Java Web Tokens  SOAP	1 point
9. W	You cannot use the API for 24 hours  that protocol does Twitter use to protect its API?  SHA1-MD5  Java Web Tokens  SOAP	1 point
9. W	that protocol does Twitter use to protect its API?  SHA1-MD5  Java Web Tokens  SOAP	1 point
	SHA1-MD5 ) Java Web Tokens ) SOAP	1 point
	SHA1-MD5 ) Java Web Tokens ) SOAP	1 point
	) Java Web Tokens ) SOAP	
	SOAP	
	OAuth	
	) WS*Security	
	) PKI-HMAC	
	that header does Twitter use to tell you how many more API requests you can make before you will be rate mited?	1 point
(	x-rate-limit-remaining	
	x-request-count-down	
	x-max-requests	
	content-type
